

TORQUE SPECIFICATIONS

Braided Stainless Steel Brake Lines:

Wrench torque for tightening AN fittings is 95 to 105 Inch-Pounds.

Braided Stainless Steel Oil Cooler Lines:

Wrench torque for tightening AN fittings is 300 to 360 Inch-Pounds.

Incorrect tightening may result in leakage or total failure of the fitting(s). All warranty claims require inspection and approval by both Racing Beat prior to replacement of any brake or oil cooler lines. No exceptions!
